ALEKSANDAR PROKOPEC

Personal Information

Birth date: 6. August 1985.
Slovenian, married
Swiss Permit B (2014 – 2019)

Summary

I am a computer science researcher with 7 years of academic and industrial experience. I published 12 peer-reviewed research publications, and led multiple software projects, supervised EPFL-hosted open source projects with external funding from Google, and organized a highly successful Coursera massive open online course on reactive programming. I have participated in several international collaborations with top universities and industrial partners. I participated on 17 industrial and research conferences and meetups, held 6 invited talks, and authored a textbook on concurrent programming in Scala. Since 2014, I am employed as a software engineer at Google.

Education

École Polytechnique Fédérale de Lausanne, Lausanne, Switzerland 2009 – 2014
Ph.D. in Computer Science
Advisor: Martin Odersky
Committee: Douglas Lea, Erik Meijer, Viktor Kuncak, Ola Svensson

Faculty of Electrical Engineering and Computing, Zagreb, Croatia 2004 – 2009
M.A. in Computer Science
Advisor: Marin Golub

Professional Experience

Software Engineer, Google Inc., Zürich, Switzerland 2014 – 2016
Product area: Geo

- Maintaining a distributed logging infrastructure for Google Maps products.
- Working on a massively distributed system used to analyze Geo product usage.
- Led the implementation of a real-time distributed pipeline for spam detection. Awarded a Google Spot Bonus for this effort.
- Designed and implemented a test automation suite for product documentation.
- Main organizer of the team-internal monthly Hackathon events. Awarded a Google Peer Bonus for this effort.

Scala Open Source Developer, Scala Team, Lausanne, Switzerland 2009 – 2016

- Designed and implemented Scala Coroutines – language extension for first-class coroutines, used to facilitate asynchronous programming.
- Designed and implemented Parallel Collections – support for data-parallel programming (part of the Scala programming language since 2011).
- Core part of the Futures and Promises working group, aimed to design the support for asynchronous programming (part of Scala programming language since 2012).

- Maintained and improved the Scala compiler and the Scala standard library.
- Engaged in various open-source activities: ScalaDays conference organization, Scala Workshop program committee member, Scala Improvement Proposal process, on-line education (MOOCs) and documentation, etc.

Collaborations	FORTH Institute of Computer Science (Greece), Computer Architecture and VLSI Systems Laboratory Research collaboration aimed at developing a novel high-performance concurrent data structures for traditional embedded systems.	2015 – now
	Typesafe (USA), Collaborating on maintenance, development, technology and innovation exchange related to the Scala project (~30 Scala developers).	2011 – now
	Akka team (Sweden), Member of the working group (~10 people) that developed a unifying asynchronous programming framework for Scala.	2011 – 2012
	Stanford University (USA), Pervasive Parallelism Laboratory Collaborated on the LMS and Delite compiler frameworks and runtimes for parallel embedded domain-specific languages (~10 people). Designed high-performance data structures and collections frontends.	2011 – 2013
Teaching Experience	External Lecturer, Co-Organizer, Reactive Programming and Parallelism Co-organized, prepared materials and exercises, led teaching staff (~7 people) on the undergraduate course on parallel, distributed, and asynchronous programming at EPFL, ~90 students.	2015
	Lecturer, Co-Organizer, Parallel Programming and Data Analysis Coursera MOOC on parallel and asynchronous programming.	2015
	Lead Organizer, Principles of Reactive Programming Coursera MOOC on reactive programming in Scala, with 2 iterations and >60,000 participants so far.	2013
	<ul style="list-style-type: none"> • Coordinated a team of three lecturers during recording and lecture material production. • Led graduate student teaching staff (~8 people), directed content production, designed and implemented exercise materials, managed the production of lecture videos, organized community TAs on Coursera. • Received the EPFL IC Teaching Award for this effort. 	
	Teaching Assistant, Functional Programming in Scala Required EPFL undergraduate course on functional programming (~160 students).	2010-2013

Research Interests	My focus is design and implementation of frameworks, programming languages, and runtime support for concurrent, parallel and distributed software development. I proposed and implemented novel persistent, concurrent and incremental data structures that support these programming paradigms. I use the Scala programming language as both the underlying development platform and research vehicle.	
Thesis	Data Structures and Algorithms for Data-Parallel Computing in a Managed Runtime Aleksandar Prokopec	EPFL 2014
Books	Learning Concurrent Programming in Scala Aleksandar Prokopec	Packt Publishing 2014
Publications	Authored 12 international research publications and several technical reports.	
	Isolates, Channels and Event Streams for Composable Distributed Programming Aleksandar Prokopec, Martin Odersky Onward! 2015	Onward! 2015
	Conc-Trees for Functional and Parallel Programming Aleksandar Prokopec, Martin Odersky Languages and Compilers for Parallel Computing 2015	LCPC 2015
	SnapQueue: Lock-Free Queue with Constant Time Snapshots Aleksandar Prokopec Scala Symposium 2015, co-located with PLDI	SCALA 2015
	Efficient Lock-Free Work-stealing Iterators for Data-Parallel Collections Aleksandar Prokopec, Dmitry Petrashko, Martin Odersky Parallel, Distributed and Network-Based Processing 2015	PDP 2015
	Containers and Aggregates, Mutators and Isolates for Reactive Programming Aleksandar Prokopec, Philipp Haller, Martin Odersky Annual Scala Workshop 2014, co-located with ECOOP	SCALA 2014
	Near Optimal Work-Stealing Tree Scheduler for Highly Irregular Data-Parallel Workloads Aleksandar Prokopec, Martin Odersky Languages and Compilers for Parallel Computing 2013	LCPC 2013
	Composition and Reuse with Compiled Domain-Specific Languages Arvind K. Sujeeth, Tiark Rompf, Kevin J. Brown, HyoukJoong Lee, Hassan Chafi, Victoria Popic, Michael Wu, Aleksandar Prokopec, Vojin Jovanovic, Martin Odersky, Kunle Olukotun European Conference on Object-Oriented Programming 2013	ECOOP 2013

	FlowPools: A Lock-Free Deterministic Concurrent Dataflow Abstraction Aleksandar Prokopec, Heather Miller, Tobias Schlatter Philipp Haller, Martin Odersky Languages and Compilers for Parallel Computing 2012	LCPC 2012
	Concurrent Tries with Efficient Non-blocking Snapshots Aleksandar Prokopec, Nathan Bronson, Phil Bagwell, Martin Odersky Symposium on Principles and Practice of Parallel Programming 2012	PPOPP 2012
	Lock-Free Resizeable Concurrent Tries Aleksandar Prokopec, Phil Bagwell, Martin Odersky Languages and Compilers for Parallel Computing 2011	LCPC 2011
	A Generic Parallel Collection Framework Aleksandar Prokopec, Phil Bagwell, Tiark Rumpf, Martin Odersky Euro-Par 2011	Euro-Par 2011
	Adaptive Mutation Operator Cycling Aleksandar Prokopec, Marin Golub International Conference on the Applications of Digital Information and Web Technologies 2009	ICADIWT 2009
Selected Tech Reports	Achieving Efficient Work-Stealing for Data-Parallel Collections Aleksandar Prokopec, Martin Odersky	April 2013
	Multi-Lane FlowPools: A Detailed Look Tobias Schlatter, Aleksandar Prokopec, Heather Miller, Philipp Haller, Martin Odersky	September 2012
	FlowPools: A Lock-Free Deterministic Concurrent Dataflow Abstraction – Proofs Aleksandar Prokopec, Heather Miller, Philipp Haller	June 2012
	Cache-Aware Lock-Free Concurrent Hash Tries Aleksandar Prokopec, Phil Bagwell, Martin Odersky	June 2011
Open Source	Scala Programming Language, Scala team member <ul style="list-style-type: none"> • Scala Coroutines, lead Scala language extension for first-class coroutines, used for easier asynchronous programming. • Reactors Framework for Distributed Programming, lead Programming framework aimed at building asynchronous, composable, distributed systems. • Scala-Blitz – High-Performance Data-Parallelism Framework, lead Scala module for highly efficient data-parallel programming. 	2009 – now

- [ScalaMeter Benchmarking Framework](#), lead
Microbenchmarking and performance regression testing framework for Scala and JVM, adopted in various open source projects.
- [Scala Futures & Promises \(Scala Improvement Proposal 14\)](#), team member
Asynchronous programming framework for Scala, used as a basic building block for other concurrency frameworks within the Scala ecosystem (part of standard Scala distribution since 2012).
- [Parallel Collections Framework](#), lead
Scala standard library module for data-parallel programming (part of the standard Scala distribution in 2011).

Java Group at Faculty of Electrical Engineering and Computing, Zagreb, 2006 – 2008

- [VHDDLlab](#), team member
Award-winning online educational VHDL editor for modeling and simulation of digital circuits (used as part of the computer science curriculum at the Faculty of Electrical Engineering and Computing in Zagreb since 2007).

Honors and Awards

Google Spot Bonus for the Distributed Real-Time Spam Detection Project	2015
Google Peer Bonus for the Team Hackathon Initiative	2015
Nominated for the Patrick Denantes Doctoral Thesis Award	2014
EPFL Outstanding Teaching Assistant Award	2013
LCPC Best Paper Presentation Award	2011
EPFL Computer Science Fellowship	2009 – 2010
University of Zagreb Rector Award for Best Project (VHDDLlab)	2008
Faculty of Electrical Engineering and Computing Josip Loncar Award	2007
Faculty of Electrical Engineering and Computing Josip Loncar Award	2006
Participation in the International Physics Olympiad (IPhO)	2004
1st Place in the Croatian National Physics Competition (Finals)	2004
Participation in the Croatian National Physics Competition (Finals)	2002
Participation in the Croatian National Physics Competition (Finals)	2001

Selected Talks

Gave 20 academic and industrial talks, 6 as an invited speaker.	
Isolates, Channels and Event Streams for Composable Distributed Programming Academic Conference Talk Pittsburgh, Pennsylvania, USA, October 29, 2015	Onward! 2015
Scala – The Learning Curve Developer Conference Talk Zurich, Switzerland, October 23, 2015	Jazoon 2015
Conc-Tree Data Structure for Functional and Parallel Programming Academic Conference Talk Raleigh, North Carolina, USA, September 10, 2015	LCPC 2015

SnapQueue: Lock-Free Queue with Constant Time Snapshots Academic Conference Talk Portland, Oregon, USA, June 13, 2015	SCALA 2015
ScalaMeter – Performance Regression Testing Framework Academic Meetup Talk ETH, Zürich, Switzerland, September 11, 2014	Oracle VM Meetup 2014
Containers and Aggregates, Mutators and Isolates for Reactive Programming Academic Conference Talk Uppsala, Sweden, July 28, 2014	SCALA 2014
Reactive Collections and 3D Engine Design Industrial Conference Talk (800 attendees) Berlin, Germany, June 24, 2014	ScalaDays 2014
Macro-based Scala Parallel Collections Industrial Conference Talk (350 attendees, invited talk) London, UK, December 2, 2013	Scala eXchange 2013
Work-Stealing Tree Scheduling Academic Conference Talk San Jose, CA, USA, September 26, 2013	LCPC 2013
Scala as a Research Tool ECOOP Tutorial (w/ Heather Miller and Philipp Haller) Montpellier, France, July 1, 2013	ECOOP 2013
Scala Performance Regression Testing Industrial Conference Talk (invited talk) London, UK, November 19, 2012	Scala eXchange 2012
Parallel Concurrent Hash Tries Industrial Conference Talk (400 attendees) London, UK, April 18, 2012	ScalaDays 2012
Concurrent Hash Tries in Scala Academic Meetup Talk (invited talk) Zagreb, Croatia, April 11, 2012	Croatian IEEE Chapter Meetup
Concurrent Tries with Efficient Non-Blocking Snapshots Academic Conference Talk New Orleans, Louisiana, USA, February 29, 2012	PPOPP 2012
Lock-Free Resizeable Concurrent Tries Academic Conference Talk Fort Collins, CO, USA, September 9, 2011	LCPC 2011
Generic Parallel Collection Framework	Euro-Par 2011

Academic Conference Talk
Bordeaux, France, September 2, 2011

[Parallel Collections](#)
Industrial Conference Talk (280 attendees, invited talk)
London, UK, June 15, 2011

Scala eXchange 2011

[Scala Parallel Collections](#)
Industrial Conference Talk
Palo Alto, CA, USA, June 3, 2011

ScalaDays 2011

[Introduction to Scala](#)
Industrial Talk, Java User Group Grenoble (invited talk)
Grenoble, France, March, 2011

JUG Meetup 2011

[Parallel Collections](#)
Industrial Conference Talk (150 attendees, invited talk)
Lausanne, Switzerland, April 15, 2010

ScalaDays 2010

External Service

Reviewer or program committee member of 7 scientific conferences and journals.

High-Level Parallel Programming and Applications, program committee member	2016
Transactions on Computers 2015, journal submission reviewer	2015
Scala Workshop 2014, program committee member	7/2014
High-Level Parallel Programming and Applications 2014, external reviewer	4/2014
ECOOP 2013, external reviewer	7/2013
Scala Workshop 2013, program committee member (co-chair)	7/2013
ScalaDays 2010, external reviewer	6/2010
ICADIWT 2009, external reviewer	8/2009

Supervised Projects¹

Supervised 14 bachelor and master student projects.

Joël Rossier, MacroGL Scala.JS Backend B.Sc. level	2/2014 – 6/2014
Sven Reber, MacroGL API Extensions B.Sc. level	2/2014 – 6/2014
Gwangbae Choi, ScalaMeter Inline Benchmarking B.Sc. level	2/2014 – 6/2014
Kristof Szabo, ScalaMeter Java API B.Sc. level	2/2014 – 6/2014
Nicolas Stucki, Scala Multiset Collection M.Sc. level	9/2013 – 1/2014

¹ EPFL research labs prepare projects for B.Sc./M.Sc. students to complete for credits. These projects are designed and supervised by EPFL doctoral assistants.

Timo Babst, Data-Parallel Raytracer B.Sc. level	9/2013 – 1/2014
Clément Moutet, Data-Parallel Flocking Algorithm B.Sc. level	9/2013 – 1/2014
Roman Zoller, ScalaMeter D3js Frontend M.Sc. level	2/2013 – 6/2013
Tobias Schlatter, FlowSeqs: Barrier-Free ParSeqs M.Sc. level, co-supervision w/ Philipp Haller & Heather Miller	9/2012 – 1/2013
Roger Vion, Improvements to ScalaMeter B.Sc. level	9/2012 – 1/2013
Tobias Schlatter, Multi-Lane FlowPools M.Sc. level, co-supervision w/ Philipp Haller & Heather Miller	2/2012 – 6/2012
Bruno Studer, A Non-Blocking Concurrent Queue Algorithm B.Sc. level	2/2012 – 6/2012
Ngoc Duy Pham, Scala Benchmarking Suite – Performance Regression Pinpointing M.Sc. level	8/2011 – 1/2012
Pamela Delgado, Scala Invariant Verifier M.Sc. level	8/2011 – 1/2012

GSoC Projects²

Supervised 4 Google Summer of Code projects.

Krzysztof Janosz, ScalaMeter -- Binary Compatible Serialization Format and Invocation Measurers	5/2015 – 9/2015
Dmitry Petrashko, Specializing Parallel Collections with Scala Macros	5/2013 – 9/2013
Ivan Oreskovic, Porting Scala Parallel Collections to the Android Platform	5/2012 – 9/2012
Heather Miller, Parallel Collections Extensions	5/2011 – 9/2011

²The Scala Team is a regular host of Google Summer of Code Projects. These are 3-month paid projects offered to students all over the world, sponsored by Google and supervised by members of various open-source organizations.
